Deep Koley

BCA Student at Techno India Hooghly Campus - 152 | Frontend Developer | Aspiring Software Engineer | Python, Java, C | DSA with C | HTML, CSS, JavaScript | OS & UNIX
Howrah, West Bengal, India

Summary

I am currently pursuing a Bachelor of Computer Applications (BCA) and have a strong interest in software development, frontend engineering, and problem solving.
My primary focus is frontend development, where I enjoy building responsive and visually appealing user interfaces. I work with HTML, CSS, JavaScript, and TailwindCSS, and I am currently expanding my skills by learning React and Angular to build modern and scalable web applications.
Alongside web development, I am strengthening my programming fundamentals by practicing C, C++, and basic Java, and actively studying Data Structures and Algorithms to improve my logical thinking and problem-solving abilities.
I enjoy learning by building projects. Some of the projects I have developed include:
Flower shop website, Coffee shop website, Multiple personal portfolio websites, BMI Calculator web application
Through these projects, I focus on improving UI design, responsiveness, clean code practices, and user experience.
I also use Git and GitHub for version control and project management, which helps me maintain organized and collaborative development workflows.
Currently, I am working toward becoming a Full-Stack Developer, combining strong front end skills with solid programming and back end knowledge.
I am always eager to learn new technologies, build meaningful projects, and continuously improve as a developer.

Experience

Techno India Group
SAP Bootcamp @ Techno Main SaltLake
January 2026 - January 2026 (1 month)

Salt Lake City, West Bengal, India

Learned the basics of SAP ABAP (Advanced Business Application Programming) and how it is used to develop business applications in SAP. Worked with ABAP programming concepts, reports, and internal tables, and gained an introduction to Object-Oriented ABAP and SAP development environment.

Techno Billion AI

AWS Academy Graduate - Cloud Foundations

July 2025 - December 2025 (6 months)

Salt Lake City, West Bengal, India

Completed the AWS Academy Cloud Foundations program, gaining a fundamental understanding of cloud computing concepts and Amazon Web Services (AWS).

Key topics covered:
Cloud computing fundamentals and cloud architecture
Core AWS services including EC2, S3, IAM, and VPC
Security and identity management in AWS
Pricing models and cloud cost management
Basic deployment and cloud infrastructure concepts

This program helped me understand how modern applications are built and deployed on cloud platforms and strengthened my interest in cloud technologies and scalable software systems.

Education

Techno India (Hooghly Campus) - 152

Bachelor's of Computer Application, Computer Science · (July 2023 - July 2027)

Kona High School

· (February 2022 - April 2023)
